

Action Plan

- The purpose of the Action Plan page in your blog is to commit to some concrete steps that can help nudge practice in your school or district toward what you've described in your personal vision statement—in particular, in relation to making sure technology is working to best advantage.
- This is a *simple* plan, not a complicated document like those you would normally construct for a school or district strategic plan.
- Three items is sufficient—one short-term, one mid-range, and one longer-term. For each action item, provide answers to the three questions. Here's a template to guide you.

Action Plan

Action: In the next month, I will...

- Who will you involve?
- What will get in your way and how will you get around it?
- How will you know if you succeeded?

Action: Before this school year is over, I will...

- Who will you involve?
- What will get in your way and how will you get around it?
- How will you know if you succeeded?

Action: Thinking ahead to next year, I will...

- Who will you involve?
- What will get in your way and how will you get around it?
- How will you know if you succeeded?
